

Instructions about the
Installation

NoName

Legend:

← CYLINDER 1.

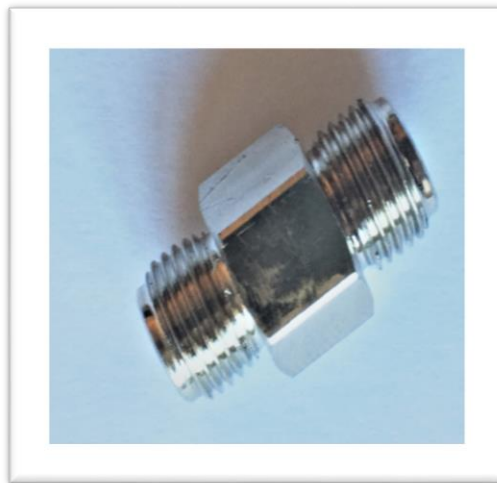

← PRESSURE REDUCER 2.

← PNEUMATIC VALVE 3.

← QUICK COUPLING 1/8 4.

← SCREW TIP 1/8 5.

← RITZEN TUBE 6x4 6.

NOT INCLUDED IN KIT

THE SIZE OF THE PIPELINE*

← NON-RETURN VALVE* 7.

← TAP* 8.

← HYDRAULIC FITTING T* 9.

INCLUDED IN KIT:

1. Cylinder
2. Pressure reducer
3. Pneumatic Valve
4. Quick Coupling 1/8 x3
5. Screw Tip 1/8
6. Ritzen Tube 6x4 x2

NOT INCLUDED IN KIT

7. Non-return Valve
8. Tap x2
9. Hydraulic Fitting T x2

Warning :

The reductions are needed from the tap at 1/8

Premises:

The No Name must be installed after the pumps.

It's must be installed in the Pipeline, you have to enter in the pipeline in order from pumps:

1. HYDRAULIC FITTING T
2. NON-RETURN VALVE
3. HYDRAULIC FITTING T

Phase A

First Hydraulic Fitting T

- Screw one Tap 8.
- Screw the reduction to 1/8
- Screw the Screw Tip 1/8
- Screw the Pneumatic Valve
- Screw in the Pneumatic Valve (to the left and to the right) two Quick Coupling 1/8

Phase B

Second Hydraulic Fitting T

- Screw one Tap 8.
- Screw the reduction to 1/8
- Screw one Quick Coupling 1/8

Phase C

- Put about 15 centimeters of Rizten Tube from the Quick Coupling in the second Hydraulic Fitting to the Quick Coupling in the left of Pneumatic Valve
- Put the Pressur Reducer in Cylinder
- Put about 2 meters of Rizten Tube from the Quick Coupling in the right of Pneumatic Valve to the Quick Coupling in the Pressure Reducer

NoName is Installed

P.S.

For security check that all the pieces are installed do not lose.
